# Box

Box collection is the answer to a tidy bathroom. Finally, everyday items like hairbrush and toothpaste have a home of their own. The Natural Oak tray from the Basq collection contrasts with the sleek white Himacs to give a surprising twist to the subtle design. Box is also available in Himacs only without the Basq tray.

Box is defined by a spacious rounded bowl, available in both single and double versions. The seamless round shape allows for easy maintenance.

Design by Marike Andeweg

○ White Himacs

Washbasin layout

Make a choice between a single or double bowl washbasin and fill in positions 1-5 or 1-6 accordingly.
Next step is to define the size of the bowl(s) indicated by the ⬒ - symbol. Go to page 37 for Box bowl sizes.

SINGLE

⬒ 576 / 1076mm
① max. 5000mm
② max. 550mm
③ min. 35mm
④ min. 32mm
⑤ min. 32mm
  min. 50mm with overflow
  min. 80mm with tap hole
  min. 120mm with tap hole + overflow

Note: when ordering only a top with bowl(s), sizes 3, 4 and 5 need to be adjusted according to the cabinet construction.

DOUBLE

⬒ 576 / 1076mm
① max. 5000mm
② max. 550mm
③ min. 35mm
④ min. 32mm
⑤ min. 32mm
  min. 50mm with overflow
  min. 80mm with tap hole
 min. 120mm with tap hole + overflow
⑥ min. 50mm

Note: when ordering only a top with bowl(s), sizes 3, 4 and 5 need to be adjusted according to the cabinet construction.

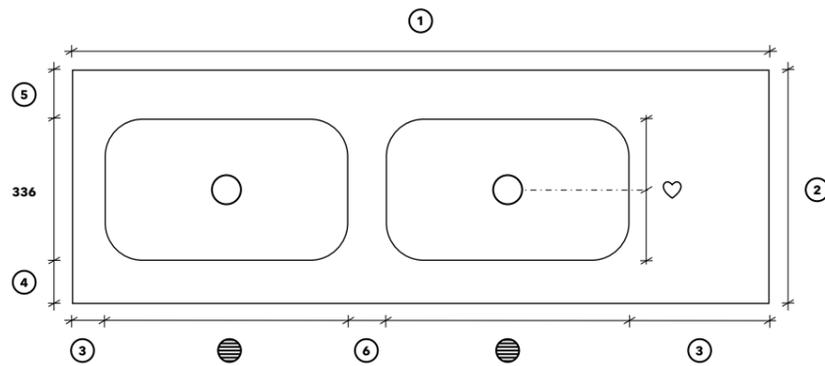

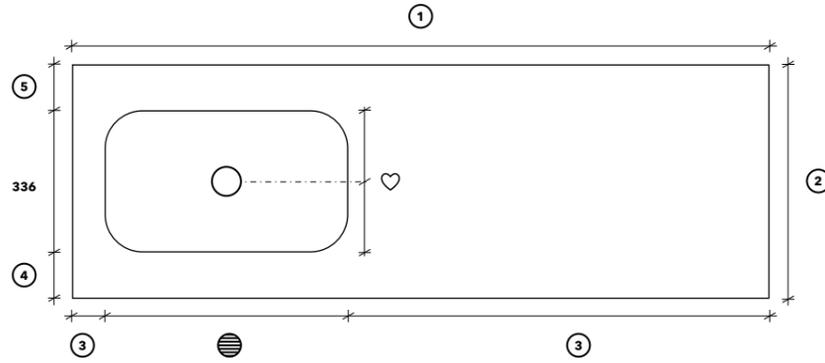

Edge

Box washbasin can be supplied with a 12mm top or with an edge from 20mm up to 900mm.
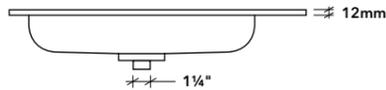

H12
12mm top sheet
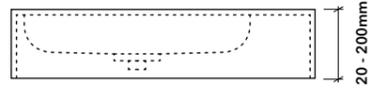

EH100
Edge 20 - 100mm high

EH150
Edge 101 - 150mm high

EH200
Edge 151 - 200mm high
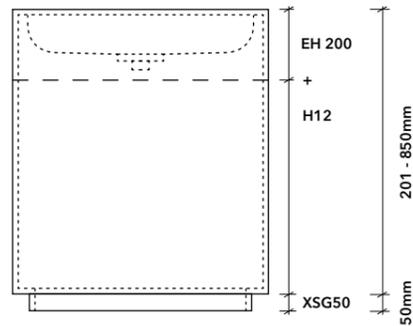

EH200 + remaining m² in H12
Edge 201 - 850mm high

XSG50
50mm plinth for floor-standing model

Bowls

CBX57688
w576 x d336 x h100mm
rec. edge height 135mm

CBX107688
w1076 x d336 x h100mm
rec. edge height 145mm
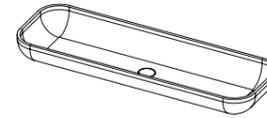

Tap hole

If you need to fit a top-mounted tap, we can pre-drill the hole (code **HH35**).

Consider the space you would need to secure the tap with a tightening ring.

Top-mounted tap without overflow:

Ø35   min. 40   min. 40
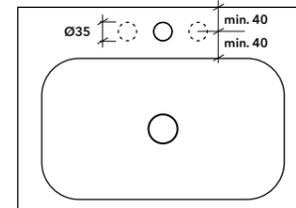

Top-mounted tap with overflow:

Ø35   min. 40   min. 80
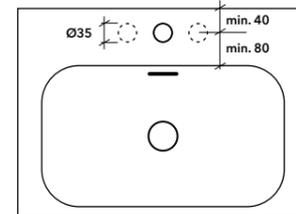

Basq trays

Box washbasin can be supplied with a plateau on the side for Basq trays. Please refer to page 10 and 45.
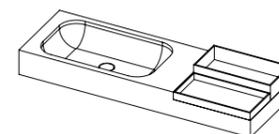

Drain type

Depending on how the washbasin needs to look and work, you can choose from different drain types for Box.

① **FLUSH DRAIN**
free flow drain

± 35   1¼"
Box bowls are standard equipped with our Flush drain. This drain allows water to flow through at all times and cannot be closed.

Flush drain is free of charge

② **POP-DOWN DRAIN**
closable drain

± 45   1¼"
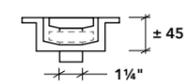

Our Pop-down drain has the same aesthetic as the Flush drain but it can be pressed down to close the drain.

Pop-down drain is calculated per bowl

For use with the Pop-down drain, Not Only White recommends to equip the bowl with an overflow.

③ **DR72 DRAIN HOLE**
for a third party drain

Ø72   ± 20   Ø46
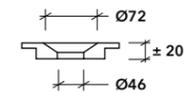

The DR72 drain hole is used for third party drains, both closable and non-closable.

DR72 drain is free of charge

Not Only White recommends to pair a third party closable drain with an overflow.

Note: when choosing a pop-down drain we recommend an overflow and extra edge height of 45mm. With a pop-down drain only we recommend an extra edge height of 15mm.

Cut-outs and edge finishes

Please refer to page 10.

Materials and colors

Himacs ⚪ White

Brackets and ribs

Please refer to page 11, where brackets and ribs are explained, to find out what type of support is needed for your washbasin.

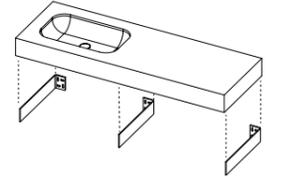

Overflow

An overflow (code **OH50**) is used for bowls equipped with a closable drain.

The overflow drain tube needs 50mm at the back of the washbasin to fit.

The overflow ring, that drains excess water into the drain, adds 30mm of height underneath the basin drain.

50   ± 30
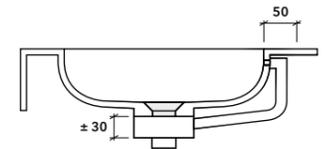

Integrated backsplash

Not Only White offers an integrated backsplash on Base washbasins (code **CSP90H**) with a maximum height of 90mm.

≤ 90
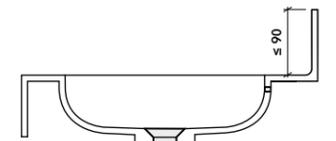

Note that a backsplash with a height over 90mm will be supplied as a separate piece without a radius edge.

Separate backsplash is calculated per m²

≥ 20
